Summary

Software Engineer with **3.7+** years of experience building **scalable microservices**, real-time systems and high-performance APIs. Expertise in system optimization, its architecture, and **AI-integrated** applications.

Work Experience

Antino Inc — *Software Development Engineer*

Jan **2025** - Present , *Bangalore & Gurgaon*

- Built backend of a collaborative **Layout Design** web application (**AutoCAD-like**) with **real-time editing**, **version control**, and commenting, reducing client software costs by **\$150K/year**
- Architected and integrated a **RAG-based AI** assistant using **vector embeddings** as POC.
- Automated **WhatsApp chatbot** workflows using **AiSensy** platform, reducing customer query resolution time by **70%**
- Implemented a role-based access approval workflow allowing users to **request project permissions** with **manager-driven approval/rejection** and real-time notifications to all related persons.
- Integrated Typesense search, improving retrieval **speed by 60%**
- Developed scalable REST APIs for financial systems of PSU **Bharat Heavy Electronics (BHEL)**
- Incorporated **third-party analytics and tracking tools** like **Grafana** and **Prometheus** enabling data-driven decisions for user engagement

TripXL Holidays — *Software Engineer 1*

May **2024** - Jan **2025** *Gurgaon*

- Developed **CRM** and customer platform's backend services using **Nest.js** for **Startup** .
- Engineered **an event-driven architecture** using **RabbitMQ** to decouple booking workflows, **improving system throughput** and fault isolation
- Enhanced **destination search experience** by incorporating **Typesense-based** indexing and querying
- Improved system reliability by introducing **retry mechanisms and circuit breakers** in microservices
- Devised an idempotent payment and invoicing workflow using Razorpay with webhook reconciliation to prevent duplicate transactions and ensure financial consistency under retry scenarios
- Implemented secure authentication and authorization flows using **OAuth 2.0**

Digivive Services — *Software Engineer*

Nov **2022** - Feb **2024** *Gurgaon*

- Contributed in development of **OTT** platform **NexgTV** serving a user base of over **10 million users**
- Built a **multi-bitrate video transcoding pipeline** (480p , 720p , 1080p) using **FFmpeg** and **HLS** segmentation, enabling **adaptive streaming across 10M+ users** via **AWS CloudFront CDN** with optimized playback performance
- Optimized API performance by introducing **Redis caching**, reducing latency by **2x**
- Set up metrics collection and visualization pipelines using **Prometheus**
- Built and fine-tuned **Elasticsearch** search pipelines for video content, significantly reducing **search latency** and **enhancing result relevance**.
- Engineered CMS frontend modules using **Vue 3**, building responsive and reusable components to streamline content management workflows and improve operational efficiency

Technical Skills

Frameworks & Languages: Node.js, Nest.js, React.js , Express , Typescript , Javascript .

Database: PostgreSQL , MongoDB , Oracle DB , MySQL , Redis

MessagingQueue and Search: RabbitMQ , SQS , Kafka , BullMQ , Elasticsearch ,Typesense

DevOps & Cloud: Docker , Jenkins & CI/CD pipeline , Linux , Basic Kubernetes and Helm , AWS

Education

Bachelor of Technology in Computer Science Engineering

Maharshi Dayanand University, **CGPA: 8.5** , Gurgaon

2019 – 2023

Achievements

- Solved **500+ DSA** problems on **Leetcode** (**Rating: 1720+**, **Top 10%**)
- Institute **Rank 3** on **GeeksForGeeks** Solved 500+ problems
- **Advance Node.js Certification** By **Hackerrank**
